MUNICIPAL POLICY.

CONSOLIDATION OF CITY SECURITIES.

BLE IN PORTY YEARS FOR THE INNUMERABLE CLASSES OF BONDS AND STOCKS NOW OUTSTAND-ING-OVER A HUNDRED MILLIONS OF THESE SECURITIES.

Controller Green has addressed an elaborate letter to Mayor Havemeyer on the subject of consoliduting the stocks and bends of the city and county into a single class. There are now more seventy-five different classes of stocks and bonds, maturing every year from 1878 to 1912, and bearing various rates of interest, from 5 to 7 per cent, Some are registered and some coupon bonds, a part payable in gold, and a part payable in currency. They amounted on July 1 to \$106,474,65477, exclusive of bonds issued in an-Fund holds \$23,270,612 27, which are chiefly long bonds. The greater part of the outstanding bends of the city are registered bonds, and the work of making the constant transfers as they are sold by one individual to another is very considerable. Each class of bonds and stock has He own peculiar form of certificate, and the chance of errors is multiplied with the increase of varieties. The ediments in the way of accomplishing a consolidason of these scenrities the Controller thus sums up :

Lich of these securities the Controller thus sums up:

1. There is a large amount of the debt held in trust, and by executors and administrators who may not have the power to convert the securities held by them even if they wished to do so. The consolidation must be entirely optional on the part of the holders of existing bonds. 2. The provisions of the shaking fund for the payment of principal as at present constitution, which apply in different degrees extrain portions or the debt, cannot be shanged without new legislation protecting the original holders as now secured. 3. The bonds fall due at different provisions of law for the security of the various classes of bonds. 6. There is now existing an issue of what is called consolidated stock, coupon and registered, due in 1901. 7. Stocks payable from the existing Sinking Fund can only be paid as they mature out of the revenues of this fund.

The Controller thinks that it is possible to fix upon a

standard bond payable in 40 years, at 5 per cent interest, psyable semi-annually, principal and interest payable m gold; while the general features of these bonds should e, they might be made to mature at different of stocks and bonds now outstanding A table of equalizations of values, taking time of payment of principal, gold and currency, and rate of interest into consideration should be publicly presented, by the rale of which any holder of existing tock could exchange his bonds for the new consolidated bonds. Adequate provisions of law must be secured so as to render the bond perfectly clear and unmistakable as to the sufficiency of legal authorization, and so that any stocks or bonds hereafter to be issued for any purpose, except short bonds payable out of taxes or asse I am melined to think that the existing provisions of

I am melined to think that the clishing processors have with some modification are sufficient to antihorize this consolidation, with the exception that they seem to require a recognition of the distinction between city and county bonds, and that each shall be known by a name specified by law. The whole legislation would have to be recast, so as to preserve involute the rights and security of cristing holders, unless they voluntarily elect to accept the new class of security. The city securities are very solidly held by conservative classes. They are in no schoe speculative, and holders will not convert into a new security without some inducement being of-

stocks and bonds which will mature from year to year There is also an elaborate statement showing all the classes of steeks and bonds, with the rate of interest and the time of maturity. In this table 75 titles of se curities are mentioned, unturing from 1873 to 1912. In the condensed form in which the table is presented below, the general purposes for which those securities have been issued are revealed ;

He accused some of the members of nepotism. He thought the Democrats were entitled to the organization of the Board, and was sorry to see three of them acting with the Republicans. Constantine Denohue, the new clerk, was third assistant clerk of the Board of Assistant Aldermen in 1870. He was also a member of the Assembly in 1866 and 1867.
